Software Engineer

Ambitious full stack software engineer with focus in React. With experience working as an executive chef and corporate catering department head, I have a demonstrated history of leadership, team management, and practical implementation of operational technologies. In the past year I have fostered a passion for web development and am eager to continue to learn.

TECHNICAL SKILLS

Javascript, React, Ruby, Rails, Python, HTML, CSS, Git

TECHNICAL PROJECTS

Bug Tracker/Project Management App - Github | Live Site
Full stack project management app using React, Rails, ChartJS, and Material UI.
- Used Rails Rest API to store data on a PostgreSQL database hosted on Heroku.
- Built functionality allowing users to create teams with other users, assign roles in projects, and assign/update discrete tickets.
- Created a dashboard component using ChatJS to display breakdowns of the user's tickets and projects.
- Implemented dynamic functionalities dependent upon each user's roles on teams and projects.

Ecommerce Site - Github | Live Site
Full stack ecommerce store using React, Rails, Stripe, and Material UI.
- Used Rails Rest API to store data on a PostgreSQL database hosted on Heroku.
- Developed a cart component and implemented Stripe for mock checkout.
- Incorporated Authentication and Authorization and allowed users to save their carts and review products.
- Utilized complex Material UI components like combo boxes and drawers.

Financial Dashboard - Github | Live Site
Tool for users to track stocks in detail and create a snapshot of their portfolio.
- Used the Finnhub API to continually update stock data, populating 10 separate components built in React with Semantic UI and TradingView Widgets.
- Implemented functionalities for users to save favorite stocks, add them to a portfolio, and view details on a dashboard.
- Created a portfolio snapshot chart with ChartJS.

EXPERIENCE

Freelance   New York, NY
Software Engineer   09/2021 - Present
- Design, develop, and deploy websites that professionally represent businesses and serve their needs.
- Research and implement technologies that are best suited for the customer's vision and budget.
- Work closely with clients, understand their needs and communicate technical concepts.

Sticky's Finger Joint   New York, NY
Catering Director   12/2019 - 12/2020
- Supervised daily catering operations for 13 locations, while overhauling standard operating procedures and communication/reporting procedures for the corporate team.
- Developed new catering workflow systems, SOPs, and sales techniques, increasing the program's operating capacity and growing revenues by 25% in 6 months.

Just Salad   New York, NY
Catering Manager   09/2018 - 12/2019
- Developed and implemented new company-wide standard operating procedures for a network of over 50 stores.
- Implemented new order management system and sales outreach strategy, leading to a substantial decrease in order refunds and over 50% growth in YoY sales

Allium   Waterbury, VT
Executive Chef   03/2017 - 08/2018
- Oversaw kitchen operations including hiring, training, ordering, costing and menu development.
